

Parent Training Course

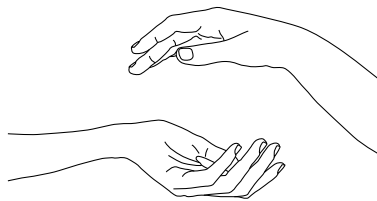

For parents of children
with Autism.

What to expect

Receiving a diagnosis

Receiving a diagnosis of autism can be a life changing process! Our goal is to help parents, grandparents, and caregivers feel more confident in their ability to help their child.

Meet the specialists

Hear from a developmental pediatrician, a pediatric resident, a speech therapist, an occupational therapist, a patient care coordinator, and a behavior therapist and parent advocate, all of which you are likely to encounter after receiving a diagnosis!

Therapies and Resources

This course is designed to help you understand the different therapies and resources available to you, both before and after receiving a diagnosis of autism.

Classes will take place virtually on Microsoft Teams. Call 208-381-9000 and ask to register for the Autism Parent Training Course to receive the link for our next class!
